

DNA "The Secret of Life"
28th February 1953

Here at The Eagle, near the old Cavendish Laboratory

Francis Crick and James Watson

the discovery

ZSL WHIPSNADE
ZOO

7:30pm - 26th February 2025
Husborne Crawley Reading Room
is pleased to announce the next
'Wine and Words on Wednesdays'

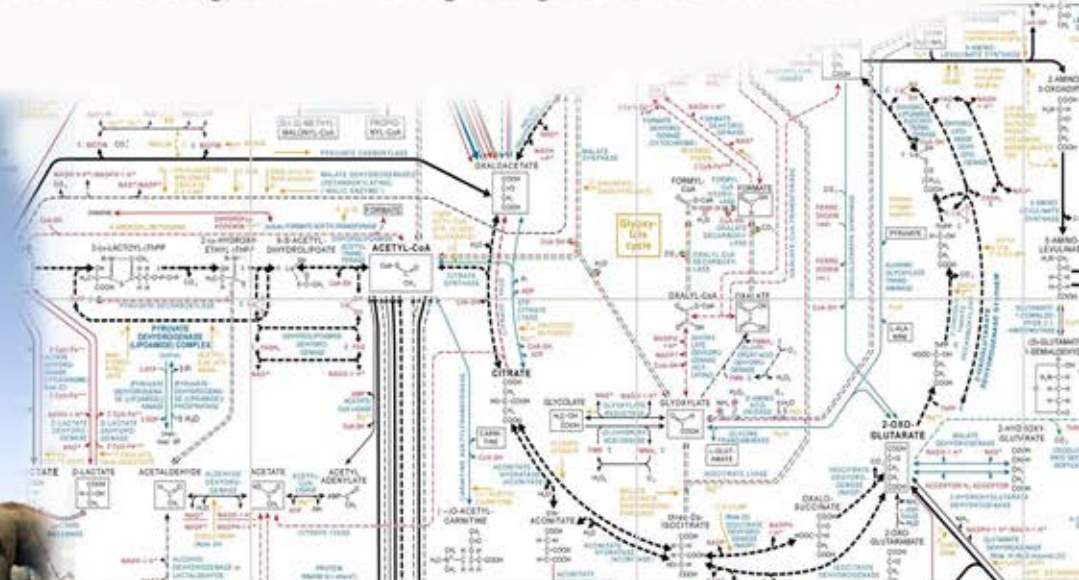

A series of talks given by local people on a diverse range of interests

The Development of Whipsnade Zoo
Paul Wilson

A trustee of the Zoological Society of London, since 2012 Paul has been actively following his dream to be involved in London Zoo. This talk looks at the rich history of Whipsnade, and asks such questions as: Why at all? Why Bedfordshire? Where did the animals come from? and what the KGB thought it was!

The Secret of Life
Dr Rob Hallam

According to a plaque on a pub wall the "Secret of Life" was discovered in the early 1950's, possibly after consuming several pints of Guinness. Let's meander down several biochemical pathways. Will they lead to immortality or will they be just a dead end?
